Passionate, adaptable leader seeks a challenging role in an innovative company. Committed to contributing through resourcefulness, innovation, and positive energy. Possesses strong communication, management, and problem-solving skills, driven by continuous learning to positively impact organizational success.

Projects

● **Restaurant Booking Website**

- Built a restaurant booking website using React, Express.js, MongoDB, and Node.js.
- Implemented user authentication with JWT and developed APIs for managing user login and table reservations.
- Created a responsive UI for booking tables, with real-time availability checks.
- Managed back-end services using Express.js and stored reservation data in MongoDB.
- Optimized for desktop with a fully responsive design using React and CSS.

● **Project Fair Website**

- Developed a project management application using React, Context API, MongoDB, Express.js, and Node.js.
- Enabled project creation, task assignment, and team collaboration with real-time task tracking.
- Built RESTful APIs with Express to handle project data and integrated MongoDB for storing and retrieving data.
- Implemented global state management using Context API for seamless updates across the app.
- Ensured a responsive user interface using React and CSS for a smooth user experience.

● **Video Uploader Website**

- Created a video management app with React and a JSON server for back-end data handling.
- Allowed users to create, edit, and delete video cards, with video playback and history tracking.
- Organized video content into buckets for easy categorization.
- Developed responsive design using CSS/Bootstrap to ensure mobile-friendly user interaction.
- Integrated JavaScript for dynamic interactivity and seamless functionality.
